Average Annual Return

Considering the negative retail market situation caused by the governmental regulation as a reaction to the COVID-19 pandemic situation, in 2020 the Orlice Shopping Center registered a 10,3% increase in overall center's turnovers. This is driven mainly by an excellent performance of the key anchor – Albert hypermarket. As a reaction to the pandemic, the total annual footfall (SC visitors) declined by 8%. The average size of a shopping basket was therefore 393 CZK. Orlice confirms its stable position on the local market of Hradec Kralove and shows its resilience to retail market fluctuations.
