# PERFORMACE - SUB-FUND 4

NAV in EUR:	234,196 million CZK					
Appreciation in 2019:	6,18 %					
Appreciation in 2020:	- 46,42 %*					
Appreciation over a month:	- 48,49 %*					
Appreciation over 6 months:	- 47,27 %*					
Year-to-date appreciation:	- 47,75 %*					

<sup>\*</sup> All figures include capital and dividend yield

#### MANAGEMENT COMMENTARY

The month-on-month performance for both sub-funds in April 2021 has been strongly affected by the annual repricing of assets owned by the sub-funds, in particular receivables w.r.t. Arca Investments, a.s. In line with legal requirements, the pricing of assets as of year end is reassessed by an independent valuation agent on an annual basis. The results are published in the annual reports as od 31.12.2020, including a short explanation of the valuation methodologies.

The considerable conrection in real value of receivables owned by the sub-funds, is firstly being reflected in the NAV as of 30.4.2021, where the value of Sub-Fudnd 3 decliend by -44.44 % and for Sub-Fund 4 by -48,89 %.

The repricing by the independent valuation agent reflects foreseeable circumstances, which can influence the real value of assets, including the uncertainty in legal outcomes and timing with regard to the repayment of receivables owned by the sub-funds.

In contrast to the methodologies of the above mentioned annual repricing, the value of NAV published so far (until March 2021) corresponds to receivables of the sub-funds coming from contractual interest on provided loans, in the amount which the sub-funds will claim against the debtors.

We consider important to highlight again, that the recent decline in NAV does not represent a realized loss, however is based on an estimate of real value by the independent valuation agent. The currently reported revised value of NAV might differ substantially from the actual payoff at the time of loan repayment, given the fact that the outcome of these valuation methods is an expected value based on assumptions of future development.

We continue to apply all available tools and measures to protect the investors' interests and to maximize the value of their shares.

# INVESTMENT STRATEGY

The underlying assets of both sub-funds are loans provided for a specified purpose. Among other projects, a large portion of the portfolio is the financing of a microfinance institution providing short and medium-term retail loans.

## **INVESTMENT GOAL**

The investment objective of both sub-funds is to generate a stable quarterly income through investing and co-investing in projects capable to deliver a continuous and sustainable cash flow. The sub-funds can pay a regular quarterly advance on dividends based on the decision of the fund management company.
